

## Resources to Develop a Business Plan

Any successful business starts with a plan. That is especially true for restaurants. A comprehensive business plan will provide a road map for creating a successful, and profitably business.

A business plan will:

- Allow you to turn your idea into an actual business.
- Understand the costs of running a business
- Prepare financially, especially if you need outside financing.
- Demonstrate a clear business vision to investors, partners, suppliers and others who will have a stake in your success.

In writing a plan, you will gain important knowledge that will be crucial to building a profitable business. Avoid taking short cuts by using off-the-shelf business plans or having someone else write it for you. For the business to be successful, you'll need to invest a lot of time, money and energy into your business. Your first big investment should be in your business plan. A realistic, well-researched plan is the first step on the road to success.

### **Here are some helpful resources from the U.S. Small Business Administration (SBA) and their Partners:**

These resources will help you learn about creating a business plan, customers, competition, future opportunities, key location factors, and much more.
